

StepsWeb Course Upgrade

What you need to know

Upgrade coming 21 April

Spelling Age Guideline

What to tell your educators:

- 1 Students' course position will change. Check to see where your students will be placed in the new Course in the graph above. i.e. a student who is currently half-way through Level E will be placed half-way through Level 5.
- 2 There is a new Foundation Course suitable for students from age 4-6. This is designed for learners at the very beginnings of literacy and specifically teaches letter sounds and phonological awareness.
- 3 Due to incorporating the new Foundation Levels, students under 7 years old will no longer automatically be put through the Placement/Spelling Test. Teachers will be required to enter date of birth for all new students starting on StepsWeb. Students who are aged 7 or over will automatically do the Test. Younger students will be automatically placed on the Foundation Course.
- 4 Educator login – the interface is also getting an upgrade and will have a new look.
- 5 Once the Course upgrade is completed (21 April), certificates that students have earned will be updated with the new Level names. If you'd like to print out certificates with the current Level names, then we'd recommend doing that before the 21st.
